DETAILED ACTION

1. This Office Action is responsive to communications filed on May 9, 2005. Applicant's amendments to claims 1, 3, 11, 13, 21, and 25 have overcome the rejection under 35 U.S.C. § 112, and thus the rejection is hereby withdrawn.

Claim Rejections - 35 USC § 102

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-2, 11-12, and 21-22 are rejected under 35 U.S.C. 102(e) as being anticipated by Meier (US 6,847,62).

Regarding claims 1, 11, and 21, as shown in Figures 1-3, Meier discloses a method for providing communication in a hybrid wired/wireless local area network (100), comprising:

sending a first messaging protocol message (VLAN tagged frames, VLAN ID) between at least one of:

a first switch (A) and a first access point (A1-A3), and

the first switch (A) and a second switch (B), (col. 3: line 5 – col. 5: line 15) ;

responsive to the first messaging protocol message (VLAN tagged frames, VLAN ID), receiving at least a second messaging protocol message (tagged/untagged frames) from at least one of

the first access point (A1), and

the first switch (A), and

the second switch (B), (col. 6: lines 14-22); and

controlling the first switch (A), the second switch (B), the first access point (A1-A3), a second access point (B1-B3), and at least one of access devices (A4) using the first messaging protocol message (VLAN tagged frames, VLAN ID), the second messaging protocol message (tagged/untagged frames) and a third messaging protocol message (join, leave, attach, detach, or alert request), (col. 5: line 25 – col. 14: line 2)

Regarding claims 2, 12, and 22, Meier also discloses generating the first messaging protocol message (VLAN untagged frames) by the first switch (col. 3: line 5 – col. 5: line 15).

Allowable Subject Matter

4. Claims 3-10, 13-20, and 23-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: Claims are considered allowable when reading the claims none of the references of record, in light of the specification, alone or in combination disclose or suggest the combination limitations specified in the dependent claims including the at least one of the first messaging protocol message, and the third messaging protocol message, is an access point status message communicated between the first switch and one of the first access point, the second access point, and the second switch.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
